ROAD RAKE

The BARBER ROAD RAKE Model 200

H. Barber & Sons, Inc. has developed the ROAD RAKE, the safest, fastest and most efficient means of removing debris from roadways. Retreads, mufflers and other debris can be removed from the road surface without the operator leaving the **safety** of the vehicle.

The Model 200 uses caster tires (A) to follow the contour of the pavement. Stainless steel tines (B) are mounted on a bar flight conveyor (C). The tines lift and elevate the unwanted debris to the hopper (D), which can be hydraulically raised and dumped. Two gutter brushes (E) on either side of the machine pull material in front of the tines. The Model 200 is operated electronically (F) by one person from the cab of the towing vehicle.

Specifications

HEIGHT.....	8' 5"	HOPPER CLEARANCE	9' 4"
WIDTH.....	8' 4"	DUMPED HEIGHT.....	8' 7"
LENGTH.....	15' 8"	CLEANING SPEED.....	1-18mph
WEIGHT.....	6460lbs.	HIGHWAY SPEED.....	55mph
TIRES.....	235/85R/16	HOPPER CAPACITY.....	4 cu yds.
CLEANING WIDTH Min.....	9' 10"	TONGUE WEIGHT.....	1900lbs.
CLEANING WIDTH Max.....	11' 5"		

Operating Features

DEBRIS REMOVED	Retreads, mufflers, hubcaps, cardboard, wood, paper, cans & litter.
DRIVE TRAIN	A 21hp water-cooled diesel engine provides hydraulic power to the conveyor belt, gutter brushes, hitch and lift mechanisms. An electrical control box activates all functions.
TOWING VEHICLE	We recommend a one-ton pickup or larger truck, with pintle hitch. The Model 200 may be towed by a tractor.
APPLICATIONS	The ROAD RAKE removes debris from roadways, parks, parking lots, open fields, stadiums and along curbs & barricades.
WARRANTY	H. Barber & Sons, Inc. warrants the Model 200 to be free from defects in parts and workmanship for 500 hours or one year, whichever occurs first.
